Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

In a user registration system, there is a requirement to implement a username validation module. Users attempting to register must adhere to specific criteria for their usernames to be considered valid.

Your task is to develop a program that takes user input for a desired username and validates it according to the following rules:

The username must not contain any spaces. The username must be at least 5 characters long.

Implement a custom exception, `InvalidUsernameException`, to handle cases where the entered username does not meet the specified criteria.

Input Format

The input consists of a string S, representing the desired username.

Output Format

If the username is valid, print "Username is valid: [S]".

If the username is invalid:

1. If the username is short, print "Invalid Username: Username must be at least 5 characters long"
2. If the username contains spaces, print "Invalid Username: Username cannot contain spaces"

Refer to the sample output for formatting specifications.

Sample Test Case

Input: John

Output: Invalid Username: Username must be at least 5 characters long

Answer

```
// You are using Java
// You are using Java
import java.util.*;
```

```
class InvalidUsernameException extends Exception {
    public InvalidUsernameException(String message) {
        super(message);
    }
}
```

```
public class Main {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        try {
            String username = sc.nextLine();

            if (username.contains(" ")) {
                throw new InvalidUsernameException("Invalid Username: Username
cannot contain spaces");
            } else if (username.length() < 5) {
```

```
        throw new InvalidUsernameException("Invalid Username: Username  
must be at least 5 characters long");  
    } else {  
        System.out.print("Username is valid: " + username);  
    }  
}  
catch (InvalidUsernameException e) {  
    System.out.print(e.getMessage());  
}  
catch (Exception e) {  
    System.out.print("An error occurred: " + e.getMessage());  
}  
sc.close();  
}
```

Status : Correct

Marks : 10/10
